

## dxFeed C/C# API 5.4.0 Release Notes

### API Changes

dxFeed C API and dxFeed C# API version 5.4.0 with fixes and improvements are already available at our [website](#).

### C API Changelog

#### Notifications

- Added ability to notify about connection status changes. See `dxfeed_connection_status_t` enum, `dxfeed_conn_status_notifier_t` callback, `dxfeed_create_connection*` and `dxfeed_get_current_connection_status` functions.

#### Samples

- Expanded parameter set by passing an authentication token: the optional command line parameter "`[-T <token>]`" is added.
- Added ability to change the number of displayed records: an optional command line parameter "`[-l <records_print_limit>]`" is added (0 - unlimited). Affected samples: `SnapshotConsoleSample`, `IncSnapshotConsoleSample`

#### Other

- Fixed build with CLion

### C# API Changelog

#### Notifications

- Added ability to notify about connection status changes. See `com.dxfeed.api.connection.ConnectionStatus` enum, `com.dxfeed.native.NativeConnection` class and `com.dxfeed.native.NativeConnection.Status` field

## Samples

- Expanded parameter set by passing an authentication token: an optional command line parameter "`[-T <token>]`" is added.
- Added ability to change the number of displayed records: an optional command line parameter "`[-l records_print_limit]`" is added (0 - unlimited). Affected samples: `dxfeed_client`, `dxfeed_order_view_sample`, `dxfeed_snapshot_sample`
- `dxfeed_simple_order_book` has been renamed to `dxfeed_simple_order_book_sample`
